BEN ANDERSON

FULL-STACK WEB DEVELOPER

PROJECTS

STACK'D (December 2019**)** ~ url goes here

Some text...

- Won best overall presentation
- React.js, Node.js, SASS, JSX and PostgresSQL
- Personal Project @ DevMountain
- Completed all functionality and styling within 8 days, given 13 days

BMDb (November 2019**)** ~ http://159.89.144.149:5000

A movie database project that allows users to search for movies, TV shows and actors. Other features include using Fandango to find movie times near the user and adding favorite movies/TV shows to their watchlist so they can keep track of what they have watched.

- Won best overall presentation
- React.js, Node.js, SASS, JSX and PostgresSQL
- Personal Project @ DevMountain
- Completed all functionality and styling within 8 days, given 13 days

BUT Head (October 2019**)** ~ no database

A no database project that allows users to create FIFA cards to sculpt an Ultimate Team. This was my first project and an idea that interested me.

- React.js, Node.js, CSS and JSX
- No Db Project @ DevMountain
- Completed within 5 days, given 5 days
- First solo project

DEVELOPMENT EDUCATION

DevMountain ~ September 2019 - December 2019

- **Full-Stack Web Development**
  - JavaScript
  - HTML/CSS
  - React.js
  - Node.js
  - PostgressSQL

WORK EXPERIENCE

Lewisville ISD ~ August 2016 - April 2017

Student Aide

An after school program for children whose parents were unable to pick up their child immediately after school let out. My job was to look after the children and make sure they went home with the correct parent or guardian.
